

Hello, I am writing to you about the issue concerning Low Power FM. It was brought to my attention that this proposal will interfere with the station KLOVE (91.9, 99.3, 89.5, and others). This station is important to me and serves to uplift and encourage the people in my community, something I am sure that you would agree is needed in these days in which we are living. This station provides priceless counseling to those who are down through the people who work for this station as they wrap arms around those who are hurting and celebrate with those who are rejoicing.

The radio waves have enough broadcasting that is down, negative, and discouraging. Please do not take away this station from our community. Thank you for your time,
Jonathan Milbourne
